

BRAVEX AERO

Social Media & Marketing Strategy

Scaling European Aerospace through Digital Impact

Prepared: July 2026

1. Executive Summary

BraveX Aero is not selling to hobbyists. Following the recent €315,000 capital injection and with goals to scale production to 500 units by 2028, the target audience comprises NATO defense, border control agencies, and emergency medical transport services. The B2B/B2G (Business-to-Government) aerospace sector requires a unique approach to digital marketing.

This strategy is designed to position BraveX as a premier European aerospace leader originating from Cluj-Napoca. By transitioning highly advanced deep-tech concepts into accessible, impact-driven visual narratives, we will build public trust, generate qualified B2G leads, and attract top-tier engineering talent.

The Core Objective: Shift the narrative from "What the drone is" (specifications) to "What the drone does" (societal impact and life-saving capabilities).

2. The Campaign Hook: #BraveTheSky

BraveX's official tagline refers to the drones as "our eyes in the sky." We will leverage this into a viral, action-oriented hashtag hook: **#BraveTheSky**.

The campaign focuses entirely on societal impact. Viral velocity is achieved through emotional resonance—audiences are more likely to share footage of a life being saved in the Apuseni Mountains than a static breakdown of battery life. By demonstrating how the VTOL-HFP2 or HFP-LS models overcome harsh environments, we create an emotional hook that drives engagement.

The "Hero" Reel Storyboard (Website & Instagram)

To launch the campaign, a flagship piece of visual content is required to explain the advantage of Fixed-Wing VTOL (combining vertical agility with fixed-wing range).

Timestamp	Visual / Action	Text Overlay / Audio
0:00 - 0:03	Shaky, smartphone-style footage of a lost hiker in a snowy Romanian forest.	<i>"When every second counts."</i> (Tense, cinematic heartbeat audio)
0:03 - 0:06	BraveX VTOL drone takes off vertically from a tight clearing (no runway needed).	<i>"Vertical Takeoff. Anywhere."</i> (Sound of electric rotors spinning up)
0:06 - 0:09	Mid-air, the drone seamlessly transitions into fixed-wing forward flight, accelerating rapidly.	<i>"Fixed-Wing Speed & Range."</i> (Music swells, fast-paced transition)
0:09 - 0:12	Switch to the drone's FLIR thermal camera UI spotting the hiker's heat signature in the dark.	<i>"Target Acquired. 15km away."</i> (Digital UI sound effects)
0:12 - 0:15	Drone drops a medical payload. Fade to BraveX logo.	<i>"#BraveTheSky"</i> (BraveX website URL displayed)

3. Content Pillars & Strategy

All Instagram and Website content will be divided into three strategic pillars to ensure a balanced mix of emotional appeal, technical validation, and employer branding.

Pillar 1: The Mission (40% of Content)

Focuses on real-world applications and societal benefits. Highlights use cases with Salvamont mountain rescue, border patrol, and high-yield agriculture. Designed to appeal to Government, Defense, and the general public.

#BraveTheSky

#SearchAndRescue

#TechForGood

#UAV

Pillar 2: The Engineering (40% of Content)

Deep dives into the technology. Focuses on carbon-fiber builds, 4-hour flight times, 250km range, and the mechanics of VTOL transition. Aimed at B2B Buyers, Investors, and Tech Talent.

#VTOL

#AerospaceEngineering

#DeepTech

#FixedWing

Pillar 3: The Origin (20% of Content)

Behind-the-scenes content at the Cluj-Napoca manufacturing line. Spotlights the engineering team and manufacturing process. Builds local pride and acts as a recruitment tool for future hires.

#MadeInRomania

#ClujTech

#BraveXAero

#ClujNapoca

4. The 30-Day Posting Rhythm

This schedule integrates Instagram (for reach and virality) with the BraveX Website (for lead capture and deep dives), establishing a consistent and reliable brand presence.

Mondays: Impact Stories (Instagram Reel)

Short-form video highlighting a specific use case. *Example: "How VTOL drones map 500 hectares of Transylvanian agriculture in one single flight."* Focuses on Pillar 1 (The Mission).

Wednesdays: Deep-Dive Tech (Website + IG Carousel)

Publish a short technical case study on the website blog (e.g., "The aerodynamics of the HFP-1"). Concurrently, share the TL;DR as a highly shareable, infographic-style Instagram Carousel linking back to the site. Focuses on Pillar 2 (The Engineering).

Fridays: The Humans of BraveX (IG Stories & Posts)

Behind-the-scenes photography of the engineers in the Cluj lab working on carbon/Kevlar composites. Features Q&As with team members and always ends with a hiring call-to-action or link to open positions. Focuses on Pillar 3 (The Origin).

5. Projected Growth & Marketing Funnel

To demonstrate the tangible value of this digital strategy, we have modeled the projected growth and lead generation funnel for the first 90 days of the campaign.

Instagram Reach & Virality Projection

The #BraveTheSky reel format is systematically designed to trigger the algorithmic explore page, resulting in compounding reach over the first three months.

The B2B/B2G Conversion Funnel

Social media reach is only the top of the funnel. This structured pathway illustrates how viral awareness is systematically converted into high-value procurement contracts.

Funnel Stage	Metric (Q1)	Action / Mechanism
Top (Awareness)	150,000+ views	Algorithmic push via viral #BraveTheSky Reels showcasing visual impact.
Middle (Interest)	5,000 visits	Traffic driven via Swipe-up links on Technical Carousels to the BraveX website.
Bottom (Lead Gen)	150 leads	Capture contact info via gated whitepaper ("The Future of UAVs in European Defense").
Conversion (Sales)	5 - 10 requests	Direct demo requests handed off immediately to the BraveX enterprise sales team.
